CLOTHING SIZE CONVERSIONS

Clothing sizes in Europe are different than those found worldwide. Each country has its own, strong identity. If you are a visitor from the USA, U.K., Australia, New Zealand, and Japan, shopping for clothes in Continental Western Europe, it might be useful to know the different measuring criteria.

The following pages are designed to be a useful tool in converting worldwide sizes. Even though we tried our best to display the data as accurate as possible, we cannot guarantee that it is absolutely correct as sizes of garments, shoes, and accessories vary between manufacturers and even between different collections by the same designer. You should use these charts for approximation only.

The best way to know which size is the perfect fit for you is to measure up a garment you have at home that is a great fit and really comfortable, and find your size within a couple of centimetres of that garment.

****The following conversion charts are to be used as REFERENCE only.**

UNIVERSAL CONVERSION CHART AT A GLANCE

Unisex Sizing	Australia	American & British Men	American Women	British Women	Continental Men	Continental Women
2	XXS	36	4	8	46	-
3	XS	38	6	10	48	38
4	S	40	8	12	50	40
5	M	42	10	14	52	42
6	L	44	12	16	54	44
7	XL	46	14	18	56	46
8	XXL	48	16	20	58	48
9	XXXL	50	18	22	60	50
10	XXXXL	52	20	24	62	52
11	XXXXXL	54	22	26	64	54
12	XXXXXXL	56	24	28	66	56

Please refer to the measurements according to these criteria:

- ✓ **CHEST** – circumference measured under the armpits
- ✓ **SHOULDER** – from top of left shoulder across back all the way to top of right shoulder, seam to seam
- ✓ **LENGHT** – from bottom of collar (collar seam) to bottom of garment
- ✓ **SLEEVE** – from top of shoulder sleeve (or strap seam) to end of cuff

How-to guide, Tips & Hints

For reliable results, please be as accurate as you possibly can. The measuring tape must be held naturally, neither stretched nor slackened.

- **Measuring your Chest:** with both your arms down, place the tape under your armpits and tape measure by turning it completely around your body without holding your breath. Your coat size typically equals your actual chest size plus a couple of inches to allow adequate room for a sweater and a comfortable movement.
- **Measuring your Waist:** tape measure around your waistline where you usually wear your trousers. If your waist size is bigger than your chest size, then the former is the one to look for in the chart in order to determine your coat size.
